Experience

DigiQuest Consultancy Services Private Limited

Apr 2024 – Present

Python Backend Developer

India

- Developed and maintained scalable backend applications using Python, Django, Flask, and Django REST Framework for production-grade client projects.
- Designed and implemented RESTful APIs, microservices, and third-party integrations including payment gateways, WhatsApp messaging APIs, and Google Meet APIs.
- Created API documentation using Swagger/OpenAPI and optimized MySQL/PostgreSQL database schemas to improve application performance and scalability.
- Deployed and managed applications on AWS EC2, implemented CI/CD pipelines, and supported production deployments and monitoring.
- Collaborated with cross-functional teams on live projects, participating in feature development, code reviews, debugging, and software delivery.

ShapeMySkills Private Limited

Jul 2023 – Aug 2023

Full Stack Development & Machine Learning Intern

Gorakhpur, Uttar Pradesh

- Completed a 6-week internship focused on Full Stack Development and Machine Learning concepts.
- Developed web application modules using Python, HTML, CSS, and database technologies.
- Worked on data preprocessing, feature engineering, and machine learning workflows for predictive analysis projects.

Projects

Online Doctor Consultation System | *Python, Django, MySQL, Google Meet API, Cashfree, WhatsApp API, AWS EC2*

- Developed a telemedicine platform enabling online and offline consultations between doctors and patients.
- Integrated Google Meet API to automatically generate and manage virtual consultation meeting links.
- Implemented Cashfree payment gateway for secure online consultation payments and booking workflows.
- Built AI-assisted symptom extraction from patient voice recordings to generate structured clinical information for doctors.
- Integrated WhatsApp-based prescription request and document sharing workflows between doctors and patients.
- Deployed and maintained production workloads on AWS EC2 with secure API integrations and database management.

Fake News Detection System | *Python, Machine Learning, NumPy, Pandas, Scikit-Learn, Matplotlib*

- Developed a machine learning model to classify news articles as genuine or fake using supervised learning techniques.
- Performed data preprocessing, feature extraction, model training, and evaluation on large textual datasets.
- Utilized Python libraries including NumPy, Pandas, Matplotlib, and Scikit-Learn for data analysis and model development.

Technical Skills

Languages: Python, SQL, HTML, CSS

Backend Frameworks: Django, Django REST Framework (DRF), Flask, FastAPI

Databases: MySQL, PostgreSQL

Cloud & DevOps: AWS EC2, CI/CD, Linux, Nginx

API & Integration: REST APIs, Swagger/OpenAPI, Google Meet API, WhatsApp API, Payment Gateway Integration (Cashfree)

Tools: Git, GitHub, Postman, VS Code

Concepts: JWT Authentication, Microservices, RBAC, Logging, SDLC

Machine Learning: NumPy, Pandas, Scikit-Learn, Matplotlib

Education

Buddha Institute of Technology

July 2020 – May 2024

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering

Gorakhpur, Uttar Pradesh
